

**FOR IMMEDIATE RELEASE****Dinerware Certifies BIXOLON !**

**BIXOLON Headquarters, Korea, April 29, 2009** - Dinerware, Inc., a leading developer of restaurant POS (point of sale) software, today announced the addition of BIXOLON to its list of certified POS hardware options

Dinerware now offers restaurateurs and other hospitality customers the SRP-350plus thermal receipt printer and SRP-275 impact receipt printer. Both printers are free of third-party drivers which results in faster, more reliable installations and performance. Dinerware certification of the BIXOLON provides customers and Dinerware authorized dealers powerful and effective printer options.

The BIXOLON SRP-350plus thermal receipt printer delivers speed and reliability like never before to high volume hospitality and retail environments. Improved functionality and specifications positions the BIXOLON n SRP-350plus as a superior offering in printer technology and underscores BIXOLON's commitment to deliver only best-in-class printing solutions.

The BIXOLON SRP-275 receipt printer is reliable, fast and enhanced to offer easy-to-use features important to restaurant, hospitality and retail environments. The SRP-275 is optimized for high-speed customer receipts, allowing kitchen orders to print faster than ever with two-color, black and red printing to highlight special offers and print logos. Bi-directional print technology allows higher printing speed and quiet printing for a peaceful atmosphere.

"Dinerware tests and evaluates hardware rigorously to ensure consumers have a superior experience," said Jeff Riley, Dinerware CEO. "Dinerware is proud to offer BIXOLON to our customers, and add additional quality products to our growing portfolio of certified hardware."

"We are pleased to provide our customers with the assurance that BIXOLON printers are fully compatible with the Dinerware software", said Richard Delaney, National Service Manager of BIXOLON.
